

"The instructors are well-respected experts in varying fields and have unique perspectives on current and future regulations and requirements."

*Jennifer Page
Compliance Team Leader /
GlaxoSmithKline*

"From learning the regulations in human health, medical device to veterinary medicine, the experience has been tremendous!"

*April L. Carroll
Associate Manager, Regulatory
Affairs / Meril*

"The UGA program distinguishes itself from other similar programs at other universities by its use of FDA Officials on its Advisory Board and subsequent involvement of FDA in development of certain course material. This adds enormous value to course content and overall credibility of the certificate or degree."

*Gary Dykstra
Director, Southeast Region /
Food and Drug Administration*

"My goal is to become certified and UGA's Certificate, as well as Master's program in Regulatory Affairs represents my best options of meeting this personal achievement."

*Caitlin Senter
Regulatory Affairs Specialist /
Kiel Laboratories*

Graduate Education Programs

**THE UNIVERSITY OF GEORGIA
COLLEGE OF PHARMACY**

Specialized education and professional development are critical to the Regulatory Affairs professional.

Due to the rapidly expanding biomedical industries, an increase in the number of Regulatory Affairs professionals is needed to maintain compliance with regulatory policies and procedures for multiple product lines. Specialized and convenient education is crucial for these busy professionals to maintain an

understanding of the scientific and technical background of new products.

UGA's educational program and degree option for Regulatory Affairs professionals covers five product areas:

- **Pharmaceuticals**
- **Biologics**
- **Medical devices**
- **Veterinary products**
- **Combination products**

Certificate Program in Pharmaceutical & Biomedical Regulatory Affairs

13 semester hours total

- Pharmaceutical, Biotechnology, and Device Industries
- Food and Drug Law
- Current Good Manufacturing Practices
- Ethics in Research

Master of Science in Pharmacy, emphasis in Pharmaceutical & Biomedical Regulatory Affairs **Completion of Graduate Certificate Program, plus 24 additional semester hours**

Additional core courses:

- Quality Control and Quality Assurance
- Pharmaceutical Process Control and Validation
- Biostatistics
- Master Thesis

Advanced electives in:

- Regulatory Affairs
- Quality Control and Quality Assurance
- Clinical Trials Management
- Developing Leadership Skills
- Drug Development
- Veterinary Products

Regulatory Affairs professionals are employed in industry, government and academia and perform a range of services related to the manufacturing and testing of pharmaceuticals, medical devices, in vitro diagnostics, biologics, biotechnology, nutritional products, cosmetics and veterinary products.

This program offers graduate credit courses from UGA's College of Pharmacy leading to a UGA certificate and, if a student completes additional graduate courses, an MS in Pharmacy with an emphasis in Regulatory Affairs.
